Product Name: Kinohimitsu Clear Activ

Benefits:

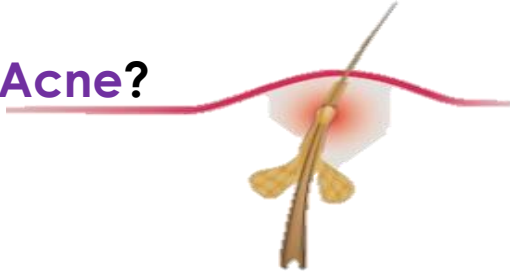

- Anti-acne & prevent breakout
- Anti-inflammation & anti-bacteria
- Control oil secretion
- Reduce skin redness
- Heal scar
- Lighten & diminish acne scars

Key Ingredients:

Milk Protein Peptide, Amla Fruit Extract, Selenium, Vitamin E

What is Acne?

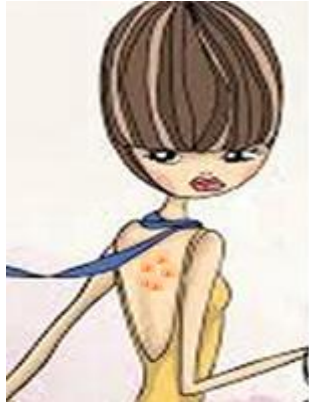

- A common skin condition that occurs when **OIL** , **DEAD SKIN CELLS**  and **BACTERIA**  clog the skin's pores.
- The causes for acne are not limited to one portion of the population. Acne affects all ages, races and gender. But it is most common in **teenagers** and **young adults**.

No worry, You're not alone!

Acne most commonly appear on the...

Face

Back

Chest

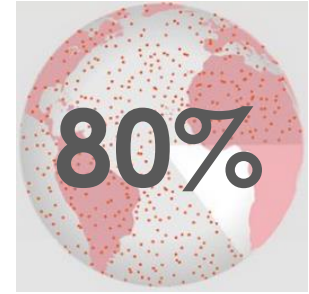

Neck

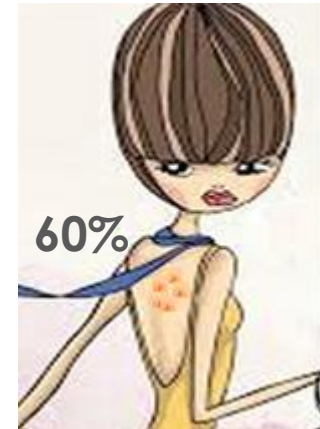

Shoulder

The Facts & Figures about Acne

- According to the USA National Institutes of Health (NIH) in 2010, an estimated **80 percent** of all people between the **ages of 11 and 30** have acne outbreaks at some point.

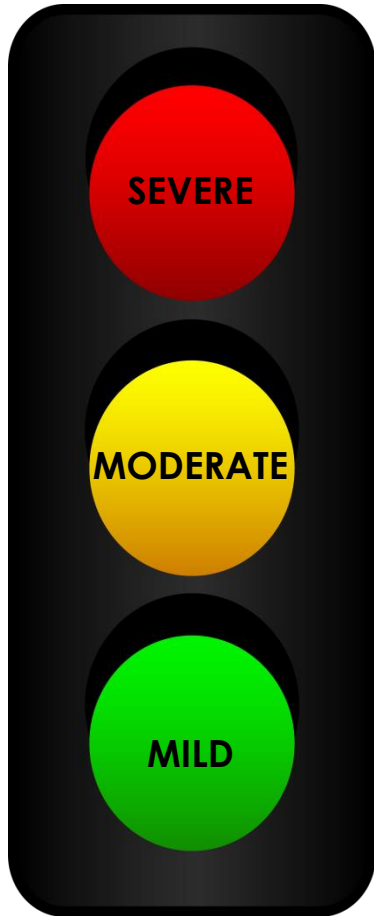

- 99%** of all people with acne are developed on the **FACE***
- 60%** of all cases affected the **BACK***
- 15%** of all cases affected the **CHEST***
- The average price for a single private laser treatment for acne ranges from **RM800 to RM3,600**.

Types of Acne

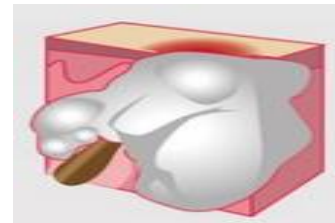

PUSTULE

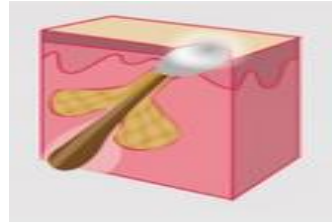

Known as 'pimple'. Red (inflamed) with pus on top.

CYST/NODULE

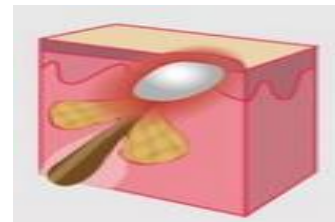

Large, inflamed painful pimples deep in the skin.

WHITEHEAD

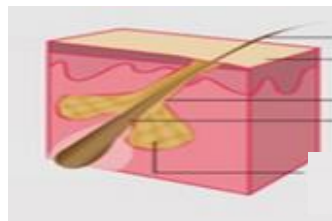

Stays under the skin surface.

PAPULE

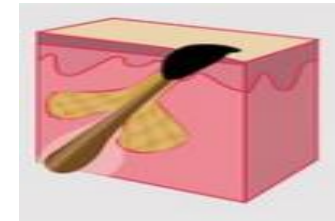

Small, inflamed, tender pink bump.

NORMAL SKIN

Hair
Skin surface
Sebum
Follicle
Sebaceous gland

BLACKHEAD

Rise to the skin's surface and look black.

Factors That Cause Acne in Teenagers

STRESS

Stress can trigger acne breakouts by weakening the follicle walls, causing breakage and inflammatory acne, as well as by causing the adrenal glands to overproduce hormones.

HORMONES

Hormonal activity such as puberty or menstrual cycles may cause acne.

DIET

A highly glycemic diet is associated with worsening acne.

PRESCRIBED MEDICATIONS

Drugs containing corticosteroids, androgens or lithium can worsen acne.

INFLAMMED

Some bacterium species such as *Propionibacterium acnes* (*P. acnes*), are widely believed to cause acne.

OIL-BASED COSMETICS

Makeup and skin care products can over-dry and irritate skin and cause more acne breakouts.

POLLUTANTS & TOXIN

Daily exposure to pollutants and the accumulated toxins in body can affect the health of the skin and, ultimately, cause acne breakouts.

GENETICS

Some people are more likely than others to get acne due to their genes.

Treatment

Kinohimitsu Clear Activ

A natural remedies for acne!

Why not?

Change the way your skin looks!

The 4 Powerful actions:

ANTI-INFLAMMATION

- Reduce the redness from inflammation
- Neutralise free radicals and protect against the skin from oxidative stress

CONTROL OIL & WATER BALANCE

- Regulate internal oil and water balance
- Reduce excess oil production
- Prevent acne breakouts

NOURISH SKIN

- Repair the damaged cells caused by blemishes
- Strengthen self-healing features
- Lighten and diminish acne scar

EELIMINATE TOXINS

- Enhance the cleansing of liver
- Promote skin detoxification

4 Awesome Ingredients in Kinohimitsu Clear Activ

Milk Protein Peptide (Lactoferrin)

Has potent antimicrobial property and helps to regulate sebum secretion.

Amla Fruit Extract

Promotes liver and skin detoxification to reduce skin irritation and blemishes, as well as brighten skin tone.

Selenium (Source of Brazil Nut)

Improves acne symptoms through its anti-inflammatory activities and protects against cellular damage from the free radicals.

Vitamin E

(Source of Wheat Germ)

Helps skin recover from acne scars. Study showed that Vitamin E plays a synergistic role with selenium in improving acne lesions*.

Product USP

EFFECTIVE

- Consist of clinically proven bioactive ingredients that reduces inflammatory lesions and regulates oil secretion through it's anti-inflammatory properties.
- Clear acne by addressing the root cause from inside out.
- A complete acne formula that effective for entire body - from head to toe.

ADVANCED COMPREHENSIVE FORMULA

- Packed full of pioneering ingredients.
- High quality ingredients that work synergistically to promote Anti-inflammatory & anti-bacteria, Control oil & water balance, Nourish skin and Eliminate toxins.

Abstract

Objective

Lactoferrin, a whey milk protein after removing precipitated casein, has a prominent activity against inflammation in vitro and systemic effects on various inflammatory diseases have been suggested. The objective was to determine dietary effects of lactoferrin-enriched fermented milk on patients with acne vulgaris, an inflammatory skin condition.

Methods

Patients 18 to 30 y of age were randomly assigned to ingest fermented milk with 200 mg of lactoferrin daily ($n = 18$, lactoferrin group) or fermented milk only ($n = 18$, placebo group) in a 12-wk, double-blind, placebo-controlled study. Acne lesion counts and grade were assessed at monthly visits. The condition of the skin by hydration, sebum and pH, and skin surface lipids was assessed at baseline and 12 wk.

Results

Acne showed improvement in the lactoferrin group by significant decreases in inflammatory lesion count by 38.6%, total lesion count by 23.1%, and acne grade by 20.3% compared with the placebo group at 12 wk. Furthermore, sebum content in the lactoferrin group was decreased by 31.1% compared with the placebo group. The amount of total skin surface lipids decreased in both groups. However, of the major lipids, amounts of triacylglycerols and free fatty acids decreased in the lactoferrin group, whereas the amount of free fatty acids decreased only in the placebo group. The decreased amount of triacylglycerols in the lactoferrin group was significantly correlated with decreases in serum content, acne lesion counts, and acne grade. No alterations in skin hydration or pH were noted in either group.

Conclusion

Lactoferrin-enriched fermented milk ameliorates acne vulgaris with a selective decrease of triacylglycerols in skin surface lipids.

Erythrocyte glutathione peroxidase activity in acne vulgaris and the effect of selenium and vitamin E treatment.

Michaëlsson G, Edqvist LE.

Abstract

The glutathione-peroxidase (GSH-Px) activity in erythrocytes was determined in 42 men with severe acne and 47 women with acne—26 of a moderate degree and 21 severe. The male acne patients had significantly lower GSH-Px levels than the controls. The women with acne did not differ significantly from the controls in this respect when patients and controls using oral contraceptives were excluded. Both the female controls and the women with acne using oral contraceptives had significantly higher GSH-Px values than the corresponding groups not using the pill. The pubertal acne girls had the same high GSH-Px activity as women on oral contraceptives. In an open trial 29 patients were given 0.2 mg of selenium (as Na₂Se O₃) + 10 mg of tocopheryl succinate for their acne twice daily for 6-12 weeks. A good result was obtained, especially in patients with pustular acne and low GSH-Px activity, and the beneficial effect was usually paralleled by a slow rise of the GSH-Px activity. Some 6-8 weeks after withdrawal of the treatment the GSH-Px values had returned to the pretreatment levels.

Product USP

NO ADDITIVES

- 100% natural and safe
- No sugar added, no preservatives, no artificial colouring or flavouring.
- SGS tested - free from 312 types of hormones, steroids and chemicals

DELICIOUS

- An exotic blend of the finest **Peach Juice** expertly mingled with the heady aroma of **Passion Fruit**.

CONVENIENT

- Light-weight sachet & convenient to bring along.

Treatment Functions	Kinohimitsu Clear Activ 	Medication 	Topical treatment 
Anti-microbial	√	√ (using antibiotic)	√ (using chemical)
Anti-inflammation	√	√ (using antibiotic)	√ (using chemical)
Antioxidants	√	X	X
